

SHASHI VARDHANA RAO DADI

Full-Stack Developer | Frontend Architect

Hyderabad, India | sasivardhan518@gmail.com | +91 7893765198 | [linkedin.com/in/shashi-dadi](https://www.linkedin.com/in/shashi-dadi)

PROFESSIONAL SUMMARY

Full-stack developer with 11+ years of experience architecting and delivering enterprise-grade web applications across the frontend, backend, and database layers. Deep expertise in Angular, React, and modern JavaScript ecosystems, combined with hands-on backend development using Node.js, Express, ASP.NET MVC (C#), Python Flask, and SQL. Proven track record in legacy-to-modern framework migrations, reusable component library design, performance optimization, micro-frontend architectures, and building AI agent-driven workflows and tools using Claude and Codex. Skilled in mentoring engineers and driving technical decisions across the full SDLC as a hands-on individual contributor. Adept at translating complex product requirements into scalable, accessible, and maintainable end-to-end solutions.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, C#, Python, SQL

Frameworks & Libraries: Angular (4-18), React, Preact, Node.js, Express.js, Knockout.js, Redux, NgRx, RxJS, Next.js, ASP.NET MVC, Flask

Backend & Databases: Node.js, Express.js, ASP.NET MVC (C#), Python (Flask), REST APIs, SQL Server, SQL

UI & Visualization: Storybook, GoJS, GraphQL, Design Systems, Component Libraries, Responsive Design, Web Accessibility (WCAG)

Tooling & Build: Webpack, Vite, Babel, npm, Yarn, ESLint, Prettier

Testing: Jest, Jasmine, Karma, Cypress, React Testing Library

Architecture & Practices: Micro-frontends, Module Federation, Performance Optimization, Code Splitting, Lazy Loading, SSR, Progressive Web Apps

AI-Assisted Development: AI Agent Workflows, Claude, Codex, Prompt-driven Development, AI-assisted Code Review

DevOps & Cloud: Git, GitHub, Bitbucket, CI/CD pipelines, IIS Deployments, Azure, AWS basics

Methodologies: Agile/Scrum, Story Pointing, Sprint Planning, Code Reviews, Mentoring, Technical Design Discussions

PROFESSIONAL EXPERIENCE

Principal Application Developer | Oracle

Apr 2025 - Present

Hyderabad, India

- Drive enhancements and feature development for the enterprise Career Site product, improving candidate experience and recruiter workflows.
- Architect and drive migration of the application from legacy Knockout.js to Preact, modernizing the codebase and improving runtime performance.
- Design and adopt AI agent-driven development workflows using tools like Claude and Codex to accelerate feature development, code reviews, and defect resolution.
- Build and orchestrate AI agents for the Career Coach AI Agent module, contributing to agent design, workflow logic, and integration with the broader Career Site platform.
- Participate in backlog grooming, sprint planning, and story-pointing ceremonies to align engineering effort with product priorities.
- Triage and resolve complex production defects across the frontend stack, ensuring high availability for global enterprise customers.
- Collaborate with cross-functional stakeholders including product managers, designers, and backend engineers to deliver scalable UI solutions.

Senior Software Engineer | Soroco India Pvt Ltd

Apr 2022 - Apr 2025

Hyderabad, India (Remote)

- Architected and maintained an internal Angular reusable UI component library documented with Storybook, accelerating feature delivery across multiple product teams.
- Delivered enhancements and feature requests for an enterprise process-analytics product, balancing roadmap items with customer-driven changes.
- Designed and built complex interactive visual components using GoJS for diagramming and GraphQL for efficient data fetching.

- Provided technical mentorship, conducted code reviews, and offered career guidance to engineering peers, contributing to on-time, high-quality delivery.
- Drove technical design discussions and frontend architecture decisions, establishing coding standards and best practices.

Staff Engineer | Nagarro

Jan 2021 - Apr 2022

Hyderabad, India

- Contributed as an individual contributor on a process-analytics product, owning frontend modules from design through production deployment.
- Designed and implemented a JSON-driven, reusable dynamic UI framework backed by Python Flask APIs, empowering the team to rapidly build forms used to trigger backend pipelines and significantly reducing development time.
- Refactored a high-volume data grid component, drastically improving render performance and scrolling responsiveness for large datasets.
- Partnered with product owners and senior engineers to translate complex analytics requirements into intuitive user interfaces.

Senior Software Engineer | InRhythm Solutions Pvt Ltd

Jun 2015 - Jan 2021

Hyderabad, India

- Independently designed and built an end-to-end internal admin application as sole individual contributor — Angular for the frontend, ASP.NET MVC (C#) for the backend, and SQL Server for the database layer — owning every layer from UI to database.
- Migrated a large legacy frontend application from Knockout.js to Angular 2+, modernizing the architecture and improving long-term maintainability.
- Executed multiple successful Angular framework upgrades from version 4 through version 8, including dependency, tooling, and breaking-change resolution.
- Developed an internal data-transformation package capable of processing very large datasets efficiently, reused across multiple internal tools.
- Owned IIS deployment pipelines for production web applications, ensuring reliable releases and rollback procedures.
- Actively contributed to design discussions, code reviews, and engineering best-practice initiatives across teams.

NOTABLE PROJECTS

- Knockout-to-Preact Migration (Oracle): Architected modernization strategy for a high-traffic enterprise career site, replacing legacy Knockout.js bindings with a performant Preact-based component model, supported by AI agent-assisted development using Claude and Codex.
- Career Coach AI Agent (Oracle): Built and integrated AI agents powering the Career Coach module, combining frontend UI, workflow orchestration, and API integration.
- Angular Component Library (Soroco): Built and maintained a Storybook-driven shared UI library that became the design-system foundation for multiple product teams.
- JSON-Driven Form Engine with Flask APIs (Nagarro): Created a configurable schema-based form framework backed by Python Flask APIs, enabling non-frontend engineers to ship pipeline-trigger UIs without writing custom UI code.
- .NET Admin Application (InRhythm): Independently built a full-stack internal admin application (Angular, ASP.NET MVC, SQL Server) end-to-end as an individual contributor.
- Knockout-to-Angular 2+ Migration (InRhythm): Re-architected a legacy single-page application, defining the migration roadmap, component patterns, and rollout strategy.

EDUCATION

Bachelor of Technology (B.Tech) — Avanthi Institute of Engineering and Technology

Aug 2011 - Apr 2015 | 80%

Intermediate (Class XII) — Narayana Junior College

Jun 2008 - Mar 2010 | 94.9%

Secondary School (Class X) — Bhashyam Public School

Jun 2007 - Mar 2008 | 87.5%
